

Title	Weekly CANCOV Meeting- UHN
Organizer	Dr. Angela Cheung
Date & Time	Monday September 26, 2022, 9:00-9:30 AM EST
Present	Parinaz, Nima, Christie, Yifan, Judy, Andrew, Teddy, Eva S, Anna, Linda, Alice, Nicholas, Hanxian, Tori & Suzanne
Absent	Gina & Sarah

Meeting Notes

Parinaz Presentation:

- Parinaz prepared a presentation for TGHRI Research Day
- Parinaz explored the link between COVID-19 and new onset diabetes mellitus as her topic
- Followed a cohort of hospitalized and non-hospitalized COVID patients from the CANCOV study over a period of twelve (12) months
- When posters come out, can they be shared with patients? They can be posted on cancov.net once ethics has been notified and it has been approved. Nick will work on setting that up along with information specifying this is a work-in-progress and not the final report.

Information on CANCOV/ICON/RECLAIM:

- For any data extraction and data cleaning, consult with Teddy
- Anna needs to be added to the CANCOV list after she sets up her profile in the directory
- ICON study is for vaccine related side effects
- As new doctor referrals come in, Suzanne will add people to the database and will send the information needed

Office Space:

- Sarah and Nima will be in the same office (room 228). A computer will be set up there depending on how often Sarah is at TGH.
- Yifan can use Nick's office (room 234) 4 days a week and see patients on Friday at the Western
- Christie will be away and only has one computer in her office (room 232). Considering taking it offline.

Other:

- Medical Grand Rounds this Wednesday on CANCOV (12pm-1pm). Iqra will forward the link to everyone when she receives it from the organizer.
- In order to see blood type from the blood work, TCAG data would need to be collected
- We do not have institutional approval on the Selenium study, RECLAIM, Oxygen and Carbon Dioxide study for brain fog. When those happen, will keep us posted.
